

## Seasons

Is it hot or cold outside? It changes with the season. There are four seasons in a year. The seasons are spring, summer, fall, and winter.

Spring is the first season of the year. Everything begins to grow. The days get warmer. The flowers bloom. Birds start to build their nests. There are stormy days and sunny days.

Summer follows spring. This is the hottest season of the year. The sun is bright, and the sky is blue. The trees are full of shade. Kids like to play outside. Families have cookouts and go swimming.

Fall is the next season. The days are warm, but the nights are cool. The leaves begin to change color and fall from the trees. The animals gather their food for the winter. Some days are rainy and windy.

Winter is the last season of the year. It is very cold. In some places it even snows. The days are short, and the sun sets early. Some animals hide for the winter. You will need a hat and gloves for this season.

What is your favorite season?
